SensorSimple® FLEX ALERT

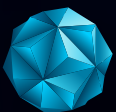

SensorSimple FLEX ALERT is a fully customizable remote mount LED device that is capable of displaying any color range for any type of condition as well as a built in buzzer option.

Optional external 13' digital temperature sensor and digital input for use with dry contact door switches or other dry contact outputs.

For use with AssetSimple cloud monitoring and associated SensorSimple devices. Can be configured to signal an alert condition for one or unlimited number of sensors within a location. Normal status can be configured in any color combination as well.

It requires the use of an AssetSimple Flex Gateway.

Outstanding RF range up to 1,000' non line of sight.
