SensorSimple®
TEMP

SensorSimple TEMP is a wireless sensor module that provides environmental temperature and humidity data for a wide range of applications from refrigerators, freezers, cold rooms, server rooms, cargo containers, trailers and many more. Internal temp plus (2) external sensor channel options.

Provides monitoring data to a wide range of applications from our AssetSimple cloud monitoring solution to existing legacy building controls.
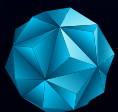

Requires the use of an AssetSimple gateway and can be installed in seconds using only its magnetic housing or with the included adhesive backed metal bracket for non magnetic applications.

Outstanding range up to 1,000' non line of sight.

10 year battery life*

SPECIFICATIONS

▸ **Dimensions:** 4.4"x3.4"x1.6"

▸ **Data:** Temperature, Humidity
Battery, RSSI

▸ **Requirements:** AssetSimple Gateway

▸ **Humidity:** 0-100%RH +/- 3% precision

▸ **Temp:** -55°C to +100°C +/- .5°C
accuracy

▸ **Battery:** ER17505 10 years @
10 min publish cycle

▸ **RF:** LoRa 915MHz

▸ **Range:** Up to 1k' non-line-of-sight

▸ **Sensor Options:** Temperature
6', 13', 25'

continuous
cloud monitoring

Continous Monitoring & Automated Alerts

SensorSimple Temp features automatic recording, cloud based access, and automatic alerts when problems are detected.

SensorSimple Temp provides a full history of sensor readings across time to make compliance and safety verification standards easy to prove.
